## Seats made by Santee

New Seats by the well known top-brand Santee. Higher quality and first class materials are the key points combined to a fairly calculated price. Santee uses premium grade flexible polyurethane foam. This highly resilient open cell foam is precisely measured to ensure proper density to provide maximum seat comfort and support to the rider. The seat pans are made of hand-laid fiberglass. By using hand-laid fiberglass, we are able to make a lightweight, flexible, yet very strong base that conforms to the lines of the bike. The Santee production seat covers are made with leather seating surfaces and vinyl side bands. Santee seats are comfortable right out of the box. No break in period is needed. If you go for a long ride your bike should have one!

## Freedom Performance Slip-On Mufflers

The guys at Freedom Performance have developed a line of slip-on mufflers that fits their True Dual Headers like a glove and will also fit your OEM headers as well. Includes a removable performance baffles. Fits all touring models 1995 - 2009. Sold in pairs.

- 689763** Freedom 3.5" Signature slip-on mufflers with black tip
- 689731** 32" Sharktail slip-on mufflers chrome
- 689764** 36" Sharktail slip-on mufflers chrome

031005

## Daytona Twin Tec Fully Programmable Ignition Systems

These ignitions are an upgrade from the non-adjustable stock OEM unit, and feature advanced electronics set into a machined billet aluminum housing. Rotary switches are used to set the operating modes (such as single or dual fire), adjust the timing advance, and select the RPM limit. Two diagnostic LEDs indicate the status and the state of the vacuum switch (VOES). The status LED is also used to indicate top dead center (TDC) for easy timing set-up. A special feature allows use of the tachometer wire for a link to a laptop PC. Windows compatible software is freely available for download at the company website.

- 031003** Fits most models from 1970 thru 1999 (except Sportster models from 1998 to present and Twin Cam 88 engines) using stock electronic ignition trigger rotor (not included)
- 672492** Internal Ignition 15005 for all 1998 thru 2002 Sportster (except 12005) *Not legal for sale or use on pollution controlled vehicles.*
- 031005** Fits carbureted Twin Cam 88 models from 1999 thru 2003

### Accessories

- 672518** 6 foot USB interface cable and Windows/ME/XP/Vista drivers on CD ROM

*Note: Sportster models from 1971 thru 1982 and Big Twins from 1970 thru 1983 require that mechanical advance units and point ignitions, or early electronic ignitions and rotors be replaced by an OEM 32402-83 ignition timing rotor (CC #59725).*

## Twin Scan II Plus Kit by Daytona Twin Tec

### Features

- Ideal tuning aid for Screamin Eagle Race Tuner (SERT), Dynojet Power Commander (PC), and Daytona Twin Tec Twin Tuner. Twin Scan software analyzes logged data and displays front and rear cylinder air/fuel ratio (AFR) and the required volumetric efficiency (VE) correction (in percent) with the same RPM rows and throttle position sensor (TPS) columns used in the SERT, PC, and Twin Tuner tables.
- Includes all features of the standard Twin Scan II.
- Sold as a complete kit including the WEGO IIID dual channel wide-band exhaust gas oxygen sensor interface for logging AFR data along with engine data.

When the WEGO IIID is connected, the Twin Scan II will log engine data along with the actual air/fuel ratio (AFR). Logged AFR data can be analyzed and displayed for Twin Cam 88 or V-Rod applications with Delphi system.

You can also display and print out the required volumetric efficiency (VE) correction (in percent) based on the AFR command. You can add data from an unlimited number of files that you previously saved. The data will be analyzed and incorporated into the table. Cells that vary more than  $\pm 0.5$  AFR from the target value are shaded blue for rich or red for lean. You can easily make the required corrections in the SERT Tuning Mode or PC program by referring to the printed VE percent correction table and marking off cells as you edit them.

### Twin Scan II Plus Kit, (includes Twin Scan II, WEGO IIID)

- 672496** Interface, two Bosch LSU 4.2 wide-band oxygen sensors, two 18 x 1.5 mm weld nuts, two 18 x 1.5 mm hex socket plugs, USB cable, and software on CDROM

# CUSTOM CHROME EUROPE NEW PARTS

## **Terminal Velocity III Close-Loop Fuel Management System by Terry Component**

- The only "Closed Loop" Fuel Management System that utilizes the factory Delphi ECU and factory sensors
- Quick connect plugs for easy installation
- Available for all 2008-up Throttle by Wire models
- Available for all Harley Delphi & Magneti-Marelli ECU
- Works in conjunction with factory "Close Loop System" and uses both factory O2 sensors
- No manual adjusting "Tamper proof" surface mount design
- Maximizes performance and efficiency while decreasing emissions and fuel consumption
- Replaces costly and punishing Dyno time
- Automatically adjust as you ride and compensates for changes in load conditions
- Re-calibrates for specific modifications made to your motorcycle such as pipes, air cleaner, etc.
- Increases horsepower and torque up to 20% for most motorcycles
- Works in conjunction with both factory and race tuner down-loads
- Made in USA

**602411** \*Fits 2005 Dyna Glide models, all Softail and Touring models 2005 thru 2006. Has Round "Throttle Position Sensor" plug and includes one O2 sensor

*Note: On 2005 Harley models they had two different Throttle Position Sensor plugs. If it's a Flat Throttle Position Sensor plug you should use CCI# 602410 Terminal Velocity III unit.*

**602413** Fits Softail models 2007 thru 2009, Dyna Glide models 2006 thru 2009 and all 2007 Touring models. Has Round "Throttle Position Sensor" plug and uses factory O2 sensors

**602414** Fits Touring models 2008 thru 2009. Has 6 pins Oval "Throttle Position Sensor" plug and uses factory O2 sensors

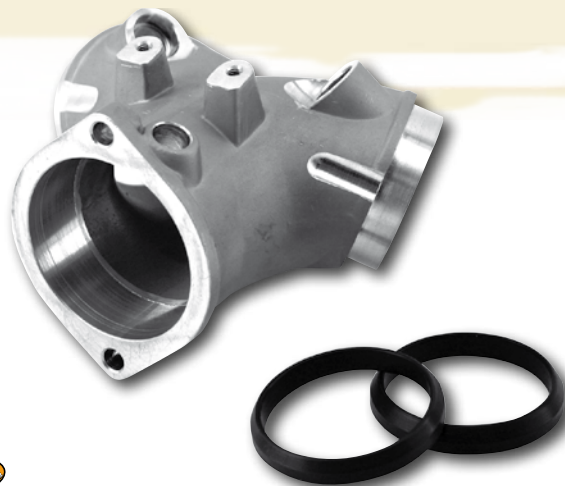

**602415** Fits Sportster models 2007 thru 2009. Has Flat "Throttle Position Sensor" plug and uses factory O2 sensors

**602416** Fits V-Rod models 2008 thru 2009. Has Flat "Throttle Position Sensor" plug and uses factory O2 sensors

**602405** Replacement O2 sensor (sold each)

**602406** Replacement O2 sensor bung (sold each)

# CUSTOM CHROME EUROPE NEW PARTS

## ThunderMax Throttle Body by Zipper's

Building a performance big-inch EFI engine? Zipper's ThunderMax EFI throttle body, manifold, and high-flow air cleaner assembly provide the big airflow required for high performance engines. These oversize 50mm and 54mm CNC-machined castings replace the 44 mm factory throttle body used on Delphi-equipped models, and are designed to accept the factory electronic components, including injectors, making assembly a snap.

**645503** 50 mm throttle body ONLY for Big Twins from 2001 thru 2005

Note: Manifold, throttle body, air filter and cover sold separately. Requires professional EFI mapping after installation.

## ThunderMax EFI Manifolds by Zipper's

Available in different widths to match cylinder lengths used on stock and larger displacement engines. They are also available in two intake port sizes; standard 1.625" I.D. to fit stock port diameters and oversize 1.780" I.D. to fit larger ports found in S&S and Zipper's High Output heads. Matching ThunderMax EFI manifolds are available for both 50 mm and 54 mm ThunderMax throttle bodies and for most popular engine kits from 95" up to 124". For use with ThunderMax Throttle Bodies in Big Twin applications from 2001 thru 2005.

**645505** For stock length cylinders with standard 1.625" port

**645506** For stock length cylinders with oversized 1.780" port

**645507** For 5.013"-5.016"-length cylinders with oversized 1.780" port

**645508** Maximum width requires machining with oversized 1.780" port

## Arlen Ness 'Big Bags' and Rear Fender Kits for Touring Models

### Arlen's 'Big Bags'

- 'Big Bags' accept OEM lids and mounting hardware
- Constructed from hi-strength fiberglass
- Smooth finish inside and out

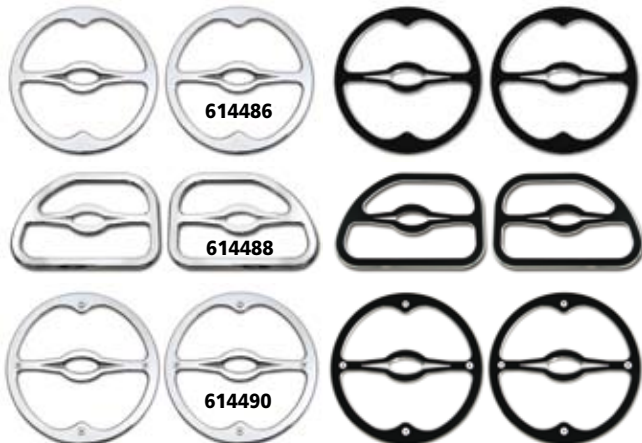

648025 Sold in pairs

### FLH/FLT Rear Fender Kits

- New Bagger-Tail and Duck-Tail fenders from Arlen Ness are a direct replacement for the OEM fender on 2002-up Touring models
- Pre-drilled bolt-on fenders give your bike a clean unique look while filling in the gap between the fender and saddlebags
- Fenders can be used with either a stock width rear tire or up to a 200mm rear tire
- Supplied with a Ness/RWD license/taillight assembly with turn signals that plug into the factory harness
- We recommend using the Bagger-Tail fender kit with either the Ness saddlebag extension (CC part #05800) or with Arlen's 'Big Bags' and using the Duck-Tail fender kit with stock saddlebags

## Stretched Gas Tanks for Touring Models by Daytec

- One-piece gas tanks feature a 3" stretch.
- Curved bottom for a custom look.
- Each tank includes a custom metal dash to replace your OEM dash.
- Available in either a 17 1/2" or 20 1/2" widths.
- Tanks hold approximately 6 gallons of fuel.
- Tanks come with a factory sealed primer on the inside of the tank.
- 2003-2007 style fuel-injected tanks accept the OEM fuel-pump assembly and use a 96-08 non-vented gas cap.
- 1996-2006 style carbureted tanks include a filler plate/neck assembly and use a 96-08 vented gas cap.
- Made in the USA

### For 96-07 FLHR (Road King) Models

- 676720** Fits 2003-2007 injected models (20.5" wide)  
**676721** Fits 1996-2006 carbureted models (20.5" wide)  
**676722** Fits 2003-2007 injected models (17.5" wide)  
**676723** Fits 1996-2006 carbureted models (17.5" wide)

### For 96-07 FLHT/FLHX/FLTR Models

- 676724** Fits 2003-2007 injected models (20.5" wide)  
**676725** Fits 1996-2006 carbureted models (20.5" wide)  
**676726** Fits 2003-2007 injected models (17.5" wide)  
**676727** Fits 1996-2006 carbureted models (17.5" wide)

*Note: Filler plate on carbureted model tanks may require modifications to reinstall early-style sending units. All tanks should be fitted and pressure-tested BEFORE painting.*

## 'Union' 2-into-1 Exhaust System by Freedom Performance

Hear Freedom Roar! A complete package of sound, power and a fit and finish like no other 2-into-1 system on the market. A 4" Diameter, 35 degree slash-cut end cap with a rolled edge and a 1 3/4" inner chromed tip gives the "Union" unique style with incredible performance. This race inspired collector system delivers power and performance. Each pipe comes complete with true full 220 degree heat shields, stainless hardware and mounting bracket. Available in either, a double wall chrome-plated or ceramic black coated finish.

**"Feel The Power Of Freedom!"**

### Chrome-Plated Systems

**689753** Fits all Touring models 2007-2008\*

**689724** Fits all Touring models 1995-2006\*

**689758** Fits all Dyna models 2006-2008\*

**689730** Fits all Dyna models 1991-2005\*

**689739** Fits all Softail® models 1986-2008\*

### Ceramic-Black Systems

**689773** Fits all Touring models 2007-2008\*

**689774** Fits all Touring models 1995-2006\*

**689776** Fits all Dyna models 2006-2008\*

**689777** Fits all Dyna models 1991-2005\*

**689744** Fits all Softail® models 1986-2008\*

*Note: O2 sensor bungs installed, O2 Sensor bung plugs and Stainless Steel mounting hardware is included*

689788

## Sharktail True Dual Systems for Softail® by Freedom Performance

This is not your average 2-into-2 exhaust system. Freedom True-Duals are the most stunning display of engineering and precision on the market, consisting of blue-proof heat-shield technology throughout the entire pipe and stainless steel hardware for muscle. Freedom also finishes every performance exhaust system with their signature show-stopping chrome plated finish. "Feel the power of Freedom" while you burn asphalt with the true duals power.

### True Duals with 32" Sharktails

**689788** Fits all Softail® models 1997-2006\*

**689789** Fits all Softail® models 2007-2008\*

### True Duals with 36" Sharktails

**689794** Fits all Softail® models 1997-2006\*

**689795** Fits all Softail® models 2007-2008\*

*Note: O2 sensor bungs installed, O2 Sensor bung plugs and Stainless Steel mounting hardware is included*

689767

## True Duals Headers for Touring Models by Freedom Performance

These true duals complement the look of your touring bike, running two independent head pipes, one for the right and one for the left side, this system both sounds and looks awesome. These head pipes will work with both OEM and most aftermarket slip-on mufflers, giving you a wider variety of choices to customize your exhaust to fit your style. Header kits include front & rear pipes, all necessary mounting hardware and full coverage heat shields "Feel The Power Of Freedom!"

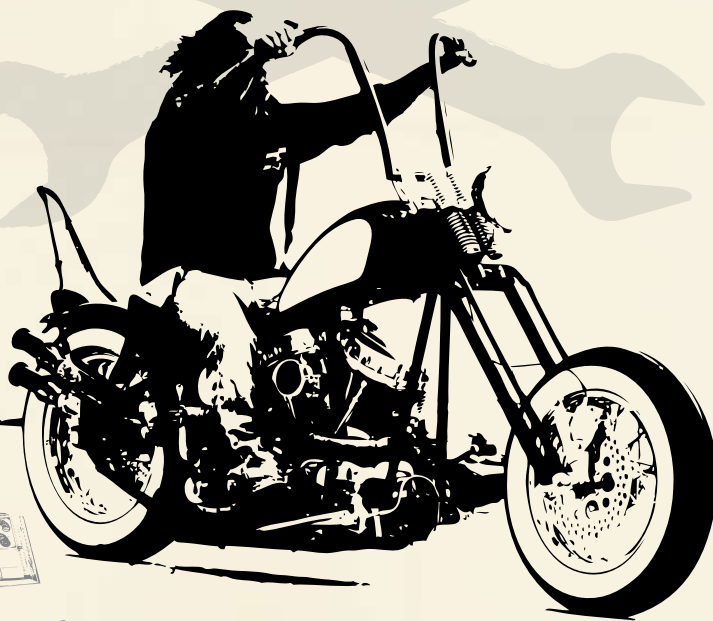

**689767** Fits all Touring models 1995-2008\*

*Note: O2 sensor bungs installed, O2 Sensor bung plugs and Stainless Steel mounting hardware is included*
